DATA ITEM DESCRIPTION

Title: VENDOR INTEGRITY STATEMENT (VIS) FOR SOFTWARE

DTIC Applicable: N/A
GIDEP Applicable: No

Office of Primary Responsibility: AS/PMA205

Applicable Forms: N/A

Use/relationship:

The Vendor Integrity Statement for software shall be used to ensure contractor-developed software is certified to be free of malicious code. A written and signed certification assures that each contractor-developed software item delivered to the Government has been examined according to National Industrial Security Program Operating Manual (NISPOM)

This DID contains the format, content, and intended use information for the data product resulting from the work task described in the contract SOW. This DID is for one-time use for solicitation N61340-15-R-0054.

Requirements:

- l. Reference documents: National Industrial Security Program Operating Manual (NISPOM), paragraph 8.201, and 8.302. The applicable issue of the documents cited herein, including their approval dates and dates of any applicable amendments, notices, and revisions, shall be as specified in the contract.
- 1.1 National Industrial Security Program Operating Manual (NISPOM), paragraph 8.201, and 8.302.
- 2. Format: Contractor format acceptable and shall contain the information as presented in Figure 1 example.
- 3. Content: The results of the examinations must indicate that the software has no elements that might be detrimental to the secure operation of the resource operating system. Elements detrimental to the secure operation include:
- 3.1 Malicious code.
- 3.2 Trojans, worms, logic bombs, and other computer viruses.
- 3.3 Backdoors,
- 3.4 Buffer overflows or memory leakage.
- 3.5 Ad-ware, Spy-ware, or web bugs that have the ability to track user behavior.

- 3.6 Code that permits functions that are beyond the actual publicized intent of application capability.
- 3.7 Software that will not function properly with the operating system configured securely.

Figure 1. Example

- Sant II Example
TO: NAWCTSD
RE: Vendor Integrity Statement for Software for Device XXXXX, under Contract XXXXXXXX
I certify that for xxxx software (list all developed and public domain software items or attached a list), version xx, there are no elements that might be detrimental to the secure operation of the resource operating system. The software runs with the operating system configured according to NISPOM paragraph 8.201, Certification Process.
Signed
Company Representative

DATA ITEM DESCRIPTION

Title: Requirements Traceability/Verification Matrix

Number: OT-15-20005 AMSC Number: N/A DTIC Applicable: N/A

Office of Primary Responsibility: AS/PMA205

Approval Date: 20141216 Limitation: N61340-15-R-0054 GIDEP Applicable: N/A

Applicable Forms: None

Use/relationship:

The Requirements Traceability/Verification Matrix (RTVM) is a product of System Requirements Analysis process which transforms contract requirements into a set of measureable and testable system requirements that specify characteristics of the system. The decomposed and derived requirements are documented in the RTVM. The RTVM includes references to demonstrate traceability between the requirements, allocated design baseline, implementation configuration items, and test procedures. The RTVM is used by the Government to verify requirements are properly decomposed and derived, allocated, and tested.

The DID contains the format, content, and intended use information for the data deliverable resulting from work task. This one-time DID is for use only on the single solicitation N61340-15-R-0054.

Requirements:

- 1. Format. Contractor's format is acceptable.
- 2. Content. The RTVM shall provide traceability between the following events:
 - Statement of Work (SOW)
 - Specification; System Requirements Review (SRR)
 - c. System Functional Review (SFR)
 - d. Preliminary Design Review (PDR)
 - e. Critical Design Review (CDR) presentations;
 - f. Test Procedure (TP)
 - g. Design Documentation (e.g., Software Version Description (SVD)
 - h. Software Product Specification (SPS)
